

CELLDUS PHARMA

Enterprise ERP & Public Commercial Web Portal — Master QA Test Plan & Verification Guide

Comprehensive test specifications, environment access setups, functional test cases, pharmaceutical compliance checks, and formal sign-off protocol for system testers and evaluators.

Project Title:	Celldus Pharma Digital Ecosystem (Website + ERP)
Testing Scope:	Public Portal, Catalog, Inquiries, Admin CMS & Pharma ERP Modules
Local Test URL:	<code>http://127.0.0.1:8000/</code>
GitHub Repository:	<code>https://github.com/ruviansari/Celldus_Pharma</code>
Compliance Standards:	WHO-GMP Guidelines & 21 CFR Part 11 Audit Trail Integrity
Document ID:	CEL-QA-TP-2026-V1.0
Publish Date:	October 2026

1. Test Environment & Access Setup

This section provides all connection URLs, access procedures, and verified credentials required by the tester to evaluate both the public-facing commercial portal and the internal staff ERP.

1.1 Portal Access URLs

Component	Direct Route	Target Audience	Type
Website Homepage	/home/	Public / Wholesalers / Doctors	Public
Products Catalog	/product/	Stockists / Buyers	Public
Contact & Inquiries	/contact/	Leads / Hospital Procurement	Public
Staff Login Portal	/dashboard/login/	Authorized QA & Staff	Secured
Executive Dashboard	/dashboard/	Management / Admins	Role-Based

1.2 Verified Test Credentials

Tester Login Instructions: Open `http://127.0.0.1:8000/dashboard/login/`. Use the primary Administrator credentials below to access full ERP and catalog control.

Role	Username / Email	Password	Assigned Permissions
Primary Super Admin	admin or ruviansari144@gmail.com	admin123	Full access to all ERP modules, CMS, user permissions, audit logs.
Operations Admin	Admin2 or admin2@gmail.com	(As assigned)	Procurement, Quality release, Batch manufacturing, Catalog.
Staff Associate	staff_user	(As assigned)	Customer inquiries viewing, CRM leads, order review.

1.3 How to Create a Direct Web Link for Remote Testers

If the tester is evaluating from a different computer or phone without local setup:

- Method A (Instant Temporary Tunnel - 2 Minutes):** With local server running on port 8000, run in terminal:
`npx localtunnel --port 8000`
Share the generated public URL (e.g. `https://celldus-preview.loca.lt`) with the tester.
- Method B (Permanent Cloud Deployment):** Connect GitHub repository `ruviansari/Celldus_Pharma` to Render.com or PythonAnywhere for a permanent 24/7 web link.

2. Public Commercial Website Test Suite

Verify that the commercial catalog, live database rendering, and inquiry submission channels function seamlessly for buyers.

TC-WEB-01 Homepage & Dynamic Portfolio Counter

High Priority

Test Route: `/home/`

Pre-conditions: Server running, active formulations in database.

Action Steps: 1. Navigate to `/home/`. 2. Inspect hero banner carousel, active formulation counter, and latest blog cards.

Expected Result: ☐ Live database count renders dynamically; hero slider navigates without visual glitches.

TC-WEB-02 Catalog Therapeutic Category Filter Tabs

High Priority

Test Route: `/product/`

Pre-conditions: Multiple therapeutic categories exist (Antibiotics, Pediatric, etc.).

Action Steps: 1. Click on category pills (e.g., "Antibiotics", "Pediatric Drops"). 2. Verify products filter instantly.

Expected Result: ☐ Only formulations belonging to selected category are displayed without 404 or page crash.

TC-WEB-03 Live Product Keyword Search Bar

Medium

Test Route: `/product/`

Action Steps: 1. Type a salt/brand keyword (e.g. Paracetamol, Cefixime) into search bar.

Expected Result: ☐ Matching products filter in real-time. If non-matching string entered, displays "No formulations found".

TC-WEB-04 Formulation Technical Details & Breadcrumbs

Medium

Test Route: `/product_details/<id>/`

Action Steps: 1. Click "View Details" on any product card. 2. Verify composition, packaging specs, and breadcrumbs. 3. Click "Home" breadcrumb.

Expected Result: ☐ Detailed pack size & indications show; breadcrumb link safely returns to `/home/` without 404 error.

TC-WEB-05 Customer Trade Inquiry Submission

Critical

Test Route: `/contact/`

Action Steps: 1. Fill full name, email, phone, subject, and medicine requirement message. 2. Click "Submit Inquiry".

Expected Result:
table.

☐ Green success alert confirms submission; record is instantly created in database CRM

3. Staff Administrative & CMS Test Suite

Verify that administrators can log in securely, update catalog items in real-time, and manage customer inquiries.

TC-ADM-01 Staff Authentication & Role Gating

Critical

Test Route: `/dashboard/login/`

Action Steps: 1. Try wrong password -> verify rejection. 2. Enter admin / admin123 -> verify redirect to dashboard. 3. Click logout.

Expected Result: ☐ Secure authentication; unauthenticated visitors are prevented from opening `/dashboard/` directly.

TC-ADM-02 Therapeutic Category CRUD Management

High Priority

Test Route: `/dashboard/categories/`

Action Steps: 1. Add new category "Dermatology & Cosmetology". 2. Check public website `/product/` to confirm new filter pill appeared. 3. Edit category name.

Expected Result: ☐ New category creates and edits successfully; immediate dynamic reflection on public website.

TC-ADM-03 Formulation Publishing & Image Upload

Critical

Test Route: `/dashboard/products/`

Action Steps: 1. Click "+ Add Product". 2. Fill Name, Category, Pack Size, Description, upload box image. 3. Save and inspect product list.

Expected Result: ☐ Product saves with image; formulation is immediately live and searchable on public website.

TC-ADM-04 Customer Inquiry CRM Desk

High Priority

Test Route: `/dashboard/customers/`

Action Steps: 1. Open inquiries tab. 2. Verify inquiry submitted in TC-WEB-05 is present at the top. 3. Click inquiry card to focus details.

Expected Result: ☐ Lead details (name, email, phone, message) display accurately without layout distortion.

4. Enterprise Pharma ERP & Compliance Test Suite

Verify that batch inventory, supply chain procurement, quality control, and 21 CFR Part 11 audit trails adhere to WHO-GMP standards.

TC-ERP-01 FEFO Inventory Lots & Quarantine Status

High Priority

Test Route: `/dashboard/` (Inventory Section)

Action Steps: 1. Review Quarantine Lots vs Available Lots metrics on main dashboard. 2. Verify batch expiry dates.

Expected Result: ☐ Quarantine status prevents unauthorized release; lots sort cleanly by Expiry Date (FEFO principle).

TC-ERP-02 Purchase Order & Procurement Lifecycle

Medium

Test Route: `/dashboard/procurement/`

Action Steps: 1. Inspect Active PO counts. 2. Verify supplier name, raw material items, and PO status progression.

Expected Result: ☐ Purchase orders track order status accurately through DRAFT, APPROVED, and RECEIVED states.

TC-ERP-03 Quality Assurance (QC) Inspection & Deviations

High Priority

Test Route: `/dashboard/quality/`

Action Steps: 1. Review Pending QC inspection list. 2. Check open Quality Deviations counter on dashboard.

Expected Result: ☐ QC inspection status (PENDING / APPROVED / REJECTED) updates accurately with QA officer disposition.

TC-ERP-04 21 CFR Part 11 Audit Trail Integrity

Compliance

Test Route: `/dashboard/` (Audit Trail Widget)

Action Steps: 1. Perform any create/edit action as admin. 2. Inspect the Recent 21 CFR Part 11 Audit Trail table on dashboard.

Expected Result: ☐ Immutable audit record logged: Timestamp, User (admin), Action Performed, and Object ID recorded.

5. Test Sign-Off & Defect Reporting Sheet

Use the formal tables below to log any discovered anomalies, UI defects, or functional issues during the testing lifecycle.

5.1 Defect Classification Matrix

Severity Level	Definition	Example In Scope
Critical (P1)	System crash, data loss, 500 server error, security breach.	Login fails, unable to submit commercial inquiry, database crash.
Major (P2)	Core business feature blocked with no immediate workaround.	Product filter fails, newly added medicine not visible in catalog.
Minor (P3)	Non-critical feature issue with existing workaround.	Search is case-sensitive, pagination issue with large dataset.
Cosmetic (P4)	Visual misalignment, typo, color inconsistency, spacing glitch.	Button padding uneven on specific mobile viewport, typo in header.

5.2 Test Execution Defect Log

Defect #	Module	Observed Issue / Steps to Reproduce	Severity	Status
BUG-01				OPEN
BUG-02				OPEN
BUG-03				OPEN

5.3 Formal QA Sign-Off

Reviewer Role	Reviewer Name	Verification Date	Final Verdict	Signature
Lead QA Tester			☐ PASS ☐ FAIL	
Project Supervisor			☐ PASS ☐ FAIL
