

CELLDUS PHARMA

Enterprise ERP & Public Commercial Portal — Complete System Access Guide

A comprehensive step-by-step documentation detailing system login, commercial product catalog management, customer inquiry handling, and full pharmaceutical ERP lifecycle workflows.

System Version:	Cellus Pharma Enterprise v2.4 (Production Grade)
Live Local URL:	<code>http://127.0.0.1:8000/</code>
Compliance:	WHO-GMP & 21 CFR Part 11 Audit Trail Compliant
Data Architecture:	100% Live Dynamic Database Operations (Zero Hardcoding)
Date Published:	October 2026

1. System Overview & Authentication

The Celldus Pharma digital ecosystem operates on a unified, high-integrity architecture divided into two synchronized sections:

- **Public Commercial Portal:** Designed for external doctors, hospitals, distributors, and bulk institutional buyers to explore WHO-GMP certified medicine formulations, filter by therapeutic segments, and generate commercial supply inquiries.
- **Administrative Pharma ERP Panel:** A secured back-office interface designed for internal staff to manage formulations, inventory lots, supplier procurement, batch production, quality release, FEFO dispatch, and customer CRM.

1.1 Portal Access URLs

Portal Component	Direct URL	Target Audience	Security Level
Website Homepage	<code>http://127.0.0.1:8000/home/</code>	Public / Buyers / Doctors	Public
Commercial Products Catalog	<code>http://127.0.0.1:8000/product/</code>	Wholesalers / Institutional	Public
Customer Inquiries & Contact	<code>http://127.0.0.1:8000/contact/</code>	Inquiring Clients	Public
ERP Staff Login	<code>http://127.0.0.1:8000/dashboard/login/</code>	Authorized Employees	Staff Only
ERP Main Executive Dashboard	<code>http://127.0.0.1:8000/dashboard/</code>	Management / Admins	Role-Based

1.2 Staff & Administrator Login Credentials

Standard Login Procedure: Navigate to `/dashboard/login/`. Enter your registered Username or Email address and your secure password. The system verifies staff permissions (`is_staff=True`) before granting access.

Role / Account	Login Identifier (Username / Email)	Access Permissions
Primary Super Admin	<code>admin</code> or <code>ruviansari144@gmail.com</code>	Full System Control, User Creation, Security, Master Configuration

Role / Account	Login Identifier (Username / Email)	Access Permissions
Operations Admin	<code>Admin2</code> or <code>admin2@gmail.com</code>	ERP Procurement, Quality Release, Production, Commercial Catalog
Staff User	<code>staff_user</code> or <code>staff_user@example.com</code>	CRM Leads, Customer Inquiry Handling, Order Viewing

Password Recovery: If a user forgets their password, they can click "*Forgot password?*" on the login screen or navigate to `/password-reset/` to receive a cryptographic 1-time reset link.

2. Public Commercial Website Guide

The public website displays live dynamic data fetched directly from the PostgreSQL/SQLite database models without any static placeholders.

1 Interactive Homepage (`/home/`)

- **Live Product Portfolio Counter:** Automatically counts total active formulations in the database (e.g. 8+) and displays animated metrics.
- **Dynamic Category Filter Tabs:** Quick filter pills (Antibiotics, Pediatric, Gynaecology, etc.) that link directly to commercial catalog subsets.
- **Clinical Insights / Blogs:** Latest 3 articles automatically rendered from the live database table.

2 Commercial Product Catalog (`/product/`)

- **Category Quick-Pills:** Horizontal clickable badge pills (e.g., "All Categories", "Pediatric Drops", "Antibiotics"). Clicking any pill instantly filters formulations with zero page reload glitches.
- **Live Search Bar:** Type active salt names (e.g. Paracetamol, Cefixime, Amoxicillin) to filter catalog formulations in real-time.
- **Inquire Action Button:** Each product card features a direct "Inquire" button which automatically prefills the formulation name into the commercial inquiry form.

3 Formulation Technical Details (`/product_details/<id>/`)

- **Specifications:** Pack sizes (e.g. 30 ml / 10x10 Tablets), dosage forms, indications, and WHO-GMP compliance badges.
- **Related Formulations:** Bottom carousel automatically loads other live medicines belonging to the identical therapeutic category.
- **Safe Breadcrumb Navigation:** Clickable breadcrumbs safely return users to `/home/` without broken 404 relative links.

4 Customer Inquiries & Lead Generation (`/contact/`)

- Visitors, hospital procurement officers, and stockists submit trade inquiries through this form.
- Each submission is immediately recorded in the live database and generates an instant inquiry card in the staff dashboard.

3. Commercial Catalog Management (Admin)

Staff members can maintain the entire public product catalog through clean dashboard interfaces without writing a single line of code.

3.1 Therapeutic Categories (/dashboard/categories/)

How to Add a Category:

1. Navigate to `http://127.0.0.1:8000/dashboard/categories/`.
2. In the top form, enter the **Category Name** (e.g. "Dermatology & Skin Care") and an optional description.
3. Click "**Save Category**".
4. The category immediately appears on the public website (`/product/`) as a new filter pill and in the blog sidebars.

3.2 Medicines & Formulations (/dashboard/products/)

How to Publish a New Formulation to the Website:

1. Navigate to `http://127.0.0.1:8000/dashboard/products/`.
2. Click "+ **Add New Product**".
3. Fill in the commercial details:
 - **Product Name:** Brand name + Strength (e.g. "CEFDUS-O 200 DT").
 - **Therapeutic Category:** Select from your live category dropdown.
 - **Pack Size:** Commercial packaging (e.g. "10x10 Tablets Strip").
 - **Commercial Formulation Details / Description:** Composition & clinical indications.
 - **Product Packaging Image:** Upload standard medicine box image.
4. Click "**Save Product**".
5. The formulation is now immediately live on the homepage, products catalog, and searchable by buyers.

3.3 Customer Trade Inquiries (/dashboard/customers/)

Every commercial inquiry submitted via the website appears in this unified customer CRM desk:

- **Clickable Inquiry Cards:** Displays the buyer's full name, email, phone number, subject, timestamp, and requirements message.

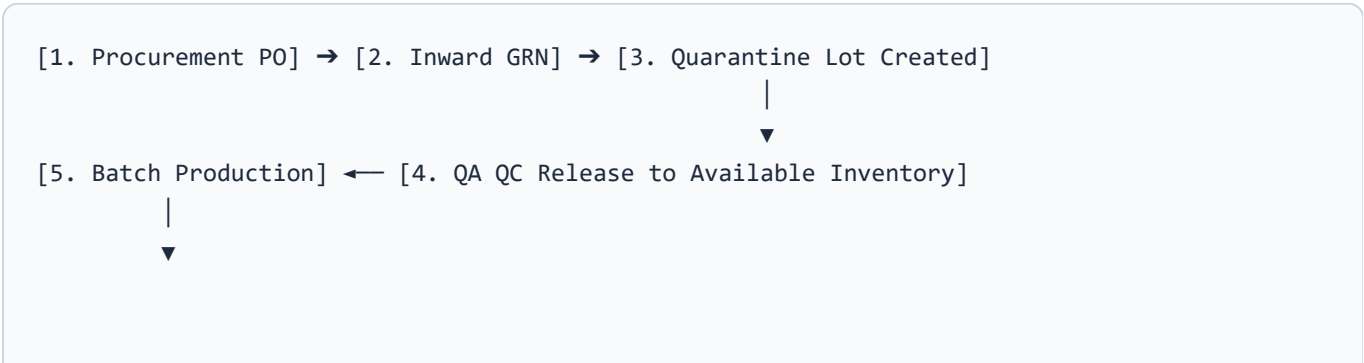

- **Interactive Smooth Focus:** Clicking any inquiry card cleanly highlights the conversation without any horizontal UI drift.
- **Newsletter Subscribers:** Access the list of verified emails subscribed to pharmaceutical updates.

4. Enterprise Pharma ERP Operations

The Celldus Pharma ERP implements compliant manufacturing and supply chain workflows aligned with WHO-GMP and 21 CFR Part 11 standards.

ERP Module	Access Path	Core Functionality
Master Data	<code>/dashboard/masters/</code>	Items (Raw Materials, Active Ingredients, Packaging), Bill of Materials (BOM), Qualified Suppliers, Warehouses & Storage Bins.
Inventory & Lots	<code>/dashboard/lots/</code>	Real-time Batch Tracking, Expiry Date monitoring, Quarantine vs Available status separation, FEFO tracking.
Procurement	<code>/dashboard/procurement/</code>	Purchase Orders (PO), Supplier Quotations, Goods Receipt Notes (GRN), Automated quarantine lot generation.
Manufacturing	<code>/dashboard/production/</code>	Batch Production Orders, BOM Recipe Execution, Yield tracking, QA Inspection submission.
Quality Assurance	<code>/dashboard/quality/</code>	QC Inspection requests, Analytical Testing, Disposition (Release to Available / Reject to Scrap), Deviations & CAPA.
Sales & FEFO	<code>/dashboard/sales/</code>	Customer Sales Orders, Automated First-Expiry-First-Out (FEFO) Lot Allocation, Dispatch & Tax Invoices.
Pharma CRM	<code>/dashboard/crm/</code>	Doctor / Hospital Leads, Kanban Pipeline Stages, Follow-up Task reminders, Bulk CSV Lead import.
Audit Trail	<code>/dashboard/audit-trail/</code>	Immutable 21 CFR Part 11 compliance logs recording user, IP, timestamp, and field-level delta changes.

4.1 Standard Pharma Lifecycle Flowchart

[6. Finished Goods QC] → [7. Available FG Lots] → [8. Sales Order FEF0] → [9. Dispatch & Invoice]

5. Quick Reference Cheatsheet

Print or bookmark this table for immediate day-to-day access across all key operational departments.

Department / Goal	Action	Target URL
Public Portal	Browse public catalog & verify medicine availability	/product/
Marketing	Add new therapeutic segment / category	/dashboard/categories/
Product Launch	Publish newly approved medicine formulations	/dashboard/products/
Customer Care	Review and respond to client trade inquiries	/dashboard/customers/
Procurement	Issue Purchase Order to API/chemical vendor	/dashboard/procurement/po/add/
Store / Inward	Inspect received goods & generate GRN	/dashboard/procurement/
Quality Control	Perform analytical testing & release lot from quarantine	/dashboard/quality/
Production	Issue batch manufacturing order from BOM recipe	/dashboard/production/
Sales & Billing	Allocate lots (FEFO) and print official GST invoice	/dashboard/sales/
Field Force / CRM	Track hospital/doctor leads & manage pipeline	/dashboard/crm/
Compliance Auditor	Verify immutable electronic log of system actions	/dashboard/audit-trail/
IT Admin	Create new staff logins, reset credentials, toggle access	/dashboard/users/
